

Smart Facts

The Smart Water LCD Unit

The Smart Water LCD unit features a high resolution full colour 2.8" touchscreen. The user interface to the system is intuitive and is designed to be very simple to operate. There are two options available with the LCD unit, a desk-mount version and a wall-mount version. The desk-mount option features an adjustable angle screen, non-slip feet and is supplied with a plug pack power supply. The wall-mount option has a detachable faceplate and is designed to fit into most standard electrical flush boxes. The wall-mount option is also supplied with a wall-mount power supply for ease of installation. The LCD units are supplied with high performance dipole antenna, however for long range applications these can be upgraded to the optional ultra long range Yagi antenna. The Smart Water components are constructed of the highest grade materials and components. These include ultra-UV resistant marine grade plastic and a high speed microcomputer processor offering superior speed, performance and reliability.
